International Sponsorship ROI Measurement

Brand Health Tracking | Financial Services

Case Study | Market Research Strategy

Project Overview

CHALLENGE

Global financial services company invested in major international sports sponsorship (Formula 1) across 10 countries. Leadership needed quantifiable evidence that sponsorship was driving brand awareness to justify multi-year investment renewal.

OBJECTIVE

Establish measurement framework to track sponsorship impact on brand health metrics across diverse markets with varying competitive dynamics and brand maturity levels. Isolate sponsorship effect from concurrent marketing activities.

METHODOLOGY

Brand Health Tracking with monthly/quarterly cadence

n=500 per market per wave
10 countries, 6 languages
6 tracking waves over 14 months
Pre/post sponsorship comparison
